

KYOCERA Smart Information Manager.

Boost efficiency with automation.

Easy-to-implement, user-friendly solution, for businesses to move from paper-based to digital document management.

KYOCERA Smart Information Manager (KSIM) is a web-based information management system for digital document and automated workflows. KSIM integrates diverse information sources into business processes to improve efficiency.

In the system, paper documents, electronic content, scanned images and supported file types are captured, managed, processed, and finalised making them easy to find. Any organisation that manages different types of documents, whether in finance and accounting, legal, human resources or procurement, KSIM is the perfect solution.

Your business challenge

- Moving from paper-based workflows to digital document management.
- Files are stored in different locations, leading to a loss of documents.
- Lack of remote file accessibility.
- Need to conform with compliance and data protection requirements.

Your KSIM solution

- Enables easy implementation and allows document information to be integrated into digital workflows.
- Centrally manages digital documents within the organisation, eliminating the impact caused by lost files.
- The web client allows access from different locations.
- Manages user access / rights and stores workflow history logs to ensure information security.

Key features.

KSIM provides an accomplished web user interface that allows users to operate the system easily.

Document Import

Easily import the document on the web browser or MFP client. OCR Engine in KSIM converts all files to searchable PDF for preview and full text search.

Document Workflow

Users can initiate document workflows for review and/or approval processes. Every action is recorded and users are able to add comments if necessary.

Document Capture

Thanks to the strong integration with Kyocera Capture Manager (KCM), documents are captured, processed and stored with extracted data in KSIM automatically.

Predefined Workflows

KSIM can import/export predefined workflows to help users introduce digital workflow promptly.

Document Search

Users can easily search the document by full text search and/or index based search.

Document Collaboration

Users can easily share documents to selected groups or users, regardless of their location.

Version Control

KSIM record every document version and user can replace to newer version or revert to older version anytime.

Document Archive

Documents are securely archived under access control and sustain accessibility to allowed users.

User management & Access control

Administrators can manage user and group, and define the role for each including access control.

Multiple file formats

KSIM handles variety formats like PDF, office document, JPG, PNG and so on.

System requirements.

Server Specifications
